Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The total number of additives and their location is unclear from the description given in Claims 1 and 15. From the specification on page 13 and the examples on page 29, it is believed by the Examiner that all five materials must be present as toner additives and that one may or may not be used as an internal additive.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over each of Ogawa (6,060,202) and Thompson (5,998,079) in view of Nishikiori (5,476,741). Ogawa (col. 6) and Thompson (col. 4-5) teach external additives for toner applications that include silica, titania, barium sulfate, polymers, and lubricants. As stated above, the Examiner has interpreted from the examples and specification that all five materials must be present and may all be externally added to toners. Nishikiori teaches that

similar additives may be internal as well as external. It would have been obvious to one of ordinary skill in the art to use any of the additives as internal additives because of the well known use of internal and external additives in toner compositions as taught by each of Ogawa, Thompson, and Nishikiori with the expectation of similar results due to the known effect of additives in toner compositions such as improved transfer, cleaning, and imaging. It also would have been obvious to one of ordinary skill in the art to use the toner composition in known multi-color image forming apparatus with the expectation of similar results as realized by the artisan in toner development including multi-color.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Chapman whose telephone number is 571-272-1381. The examiner can normally be reached on Monday - Thursday.
